Make the Following Proposal

That Solitary Islands Game Fishing Club effective season 2017/2018 adopt a tiered membership pricing structure across all

membership options. That the SIGFC ("the club") add a social membership option to all memberships at a reduced rate that entitles

a social member to participate in club events and up to two fishing days per annum. In addition that the club add ANSA membership

to all other tiers of membership, and that it be know as a "Fishing Membership". Please see attached schedule for proposed fees.

Rationale

When the SIGFC was formed, we had several hurdles to climb. One of those was to find a National Sporting Organization "NSO"

that would support our initiatives and provide a regulated and fair rule structure for our operation. Plus provide our members with the

ability to seek and claim national and international awards and records. The NSO that supported us in those early days was ANSA.

ANSA continue to be at the top of the game in relation to sport and game fishing, both recreational and professional. They provide the

framework for a competitive sport and or game fishing club to operate under, plus a myriad of add on benefits such as insurance

options for clubs and directors, and tournament accreditation that also links to your insurance policy to ensure compete coverage.

Creating more formal alliance with ANSA through compulsory fishing membership will place SIGFC in a stronger position into the future.
